

FOR IMMEDIATE RELEASE

I.C.G. Eliminates the Need for Wires: Wire-less, Profit-More

February 23, 2009 – Lake Forest, CA -The day the Digital Signage Industry has been waiting for is finally here! I.C.G.'s MobileMedia System™, the world's first and only completely wireless digital signage solution is available for purchase and ready to ship! Due to high demand, limited quantities remain available for NFR and commercial deployment.

At I.C.G. we make Digital Signage simple. With our plug and play MobileMedia System™, we eliminate headaches and disruption by combining a wireless broadband network module, WiFi router, integrated media player and hard drive, all in one.

I.C.G.'s MobileMedia System™ utilizes our patent-pending Proco Solution™ technology, enabling multimedia content to be streamed wirelessly. Additionally, it supports all media, any available screen resolution, all file formats, and the content management software of your choice. Simply connect your Flat Panel screen to our ViFi Adapter™ (its wireless too), so installation and system expansion is quick and easy. All you have to do is decide where you want the screens mounted, add power, and you are up and running.

I.C.G.'s revolutionary offering will be on display February 25th and 26th at DSE in Las Vegas, Booth #1223. Please stop by to witness this solution first-hand, or contact us directly to set an appointment for a private meeting.

About I.C.G.

I.C.G. (Internet Connectivity Group, Inc.) was formed in 2004 to create and provide wireless solutions to the enterprise marketplace. With its premiere end-to-end wireless digital signage solution, I.C.G. has created an operating infrastructure and mature distribution channels designed to revolutionize the digital signage marketplace. I.C.G.'s unique business model offers a combination of technologies that is revolutionizing the sales and marketing efforts for businesses of all sizes.
