

ICNet

Wireless internet access solution that provides enterprises with the means to increase brand exposure, generate revenue and grow business

- **Anytime, anywhere wireless broadband connectivity**
 - High-speed wireless connectivity from I.C.G.'s MobileMedia System™ to the internet or corporate VPN enabling companies of all sizes to offer state-of-the-art, high-speed data services
 - Wireless connectivity eliminates the concerns associated with hard wiring DSL, T1 and cable modems, and allows setup at any location – fixed or mobile – as well as relocation at any time without additional costs
 - Worry-free 24/7/365 service support available from ICPro
- **Billable WiFi hotspot solution hosted by ICNet and powered by I.C.G.'s MobileMedia System™**
 - Hosted wireless connectivity/WiFi solution allows companies to cost-effectively offer WiFi hotspots with minimal expense in time, labor and licensing fees
 - All-inclusive MobileMedia System™ eliminates the need for local, dedicated hotspot servers which means no infrastructure investment is required
- **Easy to manage and easy to use**
 - Single, web-based application handles all administrative and business-critical tasks including subscriber management, billing, reporting, provisioning, network management, maintenance and security
 - Robust functionality offers users the ability to manage subscriber information, track usage and traffic and implement updates from anywhere, at any time
- **Remote content filtering to control content or limit browser access**

FLEXIBLE SERVICE PLANS
